JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Acetylene links
Configurational stabilization of mixed-valence states in the star-burst tetranuclear ruthenium complex bridged with acetylene links (Aoki et al.) 189
Acid dissociation constant
Electrochemical reduction of 3-phenyl azo-2,4(3*H*,5*H*)-furandione at the DME (Helmy) 259
AC voltammetry
An ac voltammetry study of Pt oxide growth (Van der Geest et al.) 89
ALSV technique
Characterization of electrodeposited Co + Ni alloys by application of the ALSV technique. Professor Aleksandar Despic to commemorate his 70th birthday. (Jović et al.) 43
Anion adsorption
The temperature dependence of hydrogen and anion adsorption at a Pt(100) electrode in aqueous H_2SO_4 solution (Zolfaghari, Jerkiewicz) 11
Anodic oxide film
Simulation of anodic Pt oxide growth (Harrington) 101
Anomalous codeposition
Characterization of electrodeposited Co + Ni alloys by application of the ALSV technique. Professor Aleksandar Despic to commemorate his 70th birthday. (Jović et al.) 43
Aqueous|organic interface
Oxidation of ascorbate and ascorbic acid at the aqueous|organic solution interface (Suzuki et al.) 119
Ascorbate
Oxidation of ascorbate and ascorbic acid at the aqueous|organic solution interface (Suzuki et al.) 119

B3LYP
Quantum calculations on the adsorption of halide ions on the noble metals (Ignaczak, Gomes) 71
A theoretical study of the interaction of water molecules with the Cu(100), Ag(100) and Au(100) surfaces (Ignaczak, Gomes) 209

Carbon–halogen bond
A theoretical analysis of the kinetics of reductive cleavage of the carbon–halogen bond in *tert*-butyl halides in polar solvent (German et al.) 235
Catechol
Electrochemical study of catechol and some 3-substituted catechols in the presence of 4-hydroxy coumarin: application to the electro-organic synthesis of new coumestan derivatives (Golabi, Nematollahi) 127
CdSe
Photoelectrochemical behavior of coupled SnO_2|CdSe nanocrystalline semiconductor films (Nasr et al.) 201
Chronoabsorptometry
Differential cyclic voltabsorptometry and chronoabsorptometry studies of ion transfer reactions at the water|1,2-dichloroethane interface (Ding et al.) 35
Cluster calculations
Quantum calculations on the adsorption of halide ions on the noble metals (Ignaczak, Gomes) 71
A theoretical study of the interaction of water molecules with the Cu(100), Ag(100) and Au(100) surfaces (Ignaczak, Gomes) 209
Cobalt
Characterization of electrodeposited Co + Ni alloys by application of the ALSV technique. Professor Aleksandar Despic to commemorate his 70th birthday. (Jović et al.) 43
Composite film
An impedance study of electron transport and electron transfer in composite polypyrrole + polystyrenesulphonate films (Ren, Pickup) 251
Conducting polymer
In situ Fourier transform infrared attenuated total reflection (FTIR-ATR) spectroscopic investigations on the base–acid transitions of different forms of polyaniline. Base–acid transition in the leucoemeraldine form (Ping et al.) 301
Coumestan derivatives
Electrochemical study of catechol and some 3-substituted catechols in the presence of 4-hydroxy coumarin: application to the electro-organic synthesis of new coumestan derivatives (Golabi, Nematollahi) 127
Current density
Diffusion-controlled current densities close to a right-angled electrode edge (Oldham) 53
Cyclic voltammetry
Electrochemistry of monoazahemin reconstituted myoglobin at an indium oxide electrode (Taniguchi et al.) 5
On the understanding of the reduction of sulfur (S_8) in dimethylformamide (DMF) (Levillain et al.) 167
Intramolecular electron transfer within a water-soluble, ferrocene-labeled polyacrylate (Hatozaki, Anson) 195

Dichloroethane
Differential cyclic voltabsorptometry and chronoabsorptometry studies of ion transfer reactions at the water|1,2-dichloroethane interface (Ding et al.) 35
Differential cyclic voltabsorptometry
Differential cyclic voltabsorptometry and chronoabsorptometry studies of ion transfer reactions at the water|1,2-dichloroethane interface (Ding et al.) 35
Differential pulse polarography
Resolution of global signals using ratio differential pulse polarograms: determination of *p*-nitroaniline and *p*-nitrotoluene in their mixture (Grabarić et al.) 227
Diffusion
How accurate is your two-dimensional numerical simulation? Part 1. An introduction (Gavaghan) 147
Digital simulation
Intramolecular electron transfer within a water-soluble, ferrocene-labeled polyacrylate (Hatozaki, Anson) 195
2,3-Dihydroxybenzoic acid
Electrochemical study of catechol and some 3-substituted catechols in the presence of 4-hydroxy coumarin: application to the electro-organic synthesis of new coumestan derivatives (Golabi, Nematollahi) 127
Dimethylformamide
On the understanding of the reduction of sulfur (S_8) in dimethylformamide (DMF) (Levillain et al.) 167

Dissociative electron transfer
A theoretical analysis of the kinetics of reductive cleavage of the carbon–halogen bond in *tert*-butyl halides in polar solvent (German et al.) 235
Divalent metal cations
Gibbs functions for transfer of divalent metal cations from water to water + methanol mixtures using potentiometry, polarography and solubility measurements (El Marackchi et al.) 267
DME
Electrochemical reduction of 3-phenyl azo-2,4(3*H*,5*H*)-furandione at the DME (Helmy) 259
Double-layer effects
Solvent and double-layer effects on redox reactions in self-assembled monolayers of ferrocenyl–alkanethiolates on gold (Creager, Rowe) 291
Dropping mercury electrode
Electroreduction of the hydrazide of maleic acid in aqueous solutions (Shibata, Zuman) 79

Edge effects
Diffusion-controlled current densities close to a right-angled electrode edge (Oldham) 53
Electrocatalysis
Performance of a co-electrodeposited Pt–Ru electrode for the electro-oxidation of ethanol studied by in situ FTIR spectroscopy (Souza et al.) 17
Electrochemical quartz crystal microbalance
EQCM studies on polypyrrole in aqueous solutions (Xie et al.) 219
Electrochemical reaction
EQCM studies on polypyrrole in aqueous solutions (Xie et al.) 219
Electrochemistry
Towards the electrochemical manufacture of superconductor precursor films in the presence of an ultrasonic field (Richardson et al.) 21
In situ Fourier transform infrared attenuated total reflection (FTIR-ATR) spectroscopic investigations on the base–acid transitions of different forms of polyaniline. Base–acid transition in the leucoemeraldine form (Ping et al.) 301
Electrode edge
Diffusion-controlled current densities close to a right-angled electrode edge (Oldham) 53
Electrode surface
How accurate is your two-dimensional numerical simulation? Part 1. An introduction (Gavaghan) 147
Electrogenerated dication
Detailed analysis of reaction kinetics and mechanisms of electrogenerated tetramethoxythianthrene cation radical and dication (Oyama et al.) 1
Electron transfer
Intramolecular electron transfer within a water-soluble, ferrocene-labeled polyacrylate (Hatozaki, Anson) 195
An impedance study of electron transport and electron transfer in composite polypyrrole + polystyrenesulphonate films (Ren, Pickup) 251
Electron transfer kinetics
Electron transfer of horse spleen ferritin at gold electrodes modified by self-assembled monolayers (Martin et al.) 279
Electron transfer reaction
Oxidation of ascorbate and ascorbic acid at the aqueous|organic solution interface (Suzuki et al.) 119
Electron transport
An impedance study of electron transport and electron transfer in composite polypyrrole + polystyrenesulphonate films (Ren, Pickup) 251
Electro-organic synthesis
Electrochemical study of catechol and some 3-substituted catechols in the presence of 4-hydroxy coumarin: application to the electro-organic synthesis of new coumestan derivatives (Golabi, Nematollahi) 127
Electroreduction
Electroreduction of the hydrazide of maleic acid in aqueous solutions (Shibata, Zuman) 79
Electroreduction mechanism
Electrochemical reduction of 3-phenyl azo-2,4(3*H*,5*H*)-furandione at the DME (Helmy) 259
EQCM
Voltammetric and electrogravimetric study of manganese dioxide thin film electrodes. Part 1. Electrodeposited films (Wu et al.) 159
Ethanol
Performance of a co-electrodeposited Pt–Ru electrode for the electro-oxidation of ethanol studied by in situ FTIR spectroscopy (Souza et al.) 17
Ethyl anthraquinone
M–SPE composite powder microelectrodes used in organic electrosynthesis (Jiang et al.) 31

Ferritin
Electron transfer of horse spleen ferritin at gold electrodes modified by self-assembled monolayers (Martin et al.) 279
Ferrocene
Intramolecular electron transfer within a water-soluble, ferrocene-labeled polyacrylate (Hatozaki, Anson) 195
Ferrocenyl–alkanethiolates
Solvent and double-layer effects on redox reactions in self-assembled monolayers of ferrocenyl–alkanethiolates on gold (Creager, Rowe) 291
Film
Voltammetric and electrogravimetric study of manganese dioxide thin film electrodes. Part 1. Electrodeposited films (Wu et al.) 159
Film growth
Simulation of anodic Pt oxide growth (Harrington) 101

p-GaAs electrode
Uncommon behavior of the p-GaAs electrode during the reduction of oxygen in liquid acidic ammonia (Goncalves et al.) 25
Gibbs energy
Characterization of electrodeposited Co + Ni alloys by application of the ALSV technique. Professor Aleksandar Despic to commemorate his 70th birthday. (Jović et al.) 43
Gibbs function of transfer
Gibbs functions for transfer of divalent metal cations from water to water + methanol mixtures using potentiometry, polarography and solubility measurements (El Marackchi et al.) 267
Glucose
Investigation of the origin of the glucose response in a glucose oxidase|polyaniline system (Skinner, Hall) 179
Glucose oxidase
Investigation of the origin of the glucose response in a glucose oxidase|polyaniline system (Skinner, Hall) 179
Growth kinetics
An ac voltammetry study of Pt oxide growth (Van der Geest et al.) 89

Halide ions
Quantum calculations on the adsorption of halide ions on the noble metals (Ignaczak, Gomes) 71
Hydrogen underpotential deposition
The temperature dependence of hydrogen and anion adsorption at a Pt(100) electrode in aqueous H_2SO_4 solution (Zolfaghari, Jerkiewicz) 11

Immittance spectroscopy
Investigation of the origin of the glucose response in a glucose oxidase|polyaniline system (Skinner, Hall) 179

Impedance spectroscopy
An impedance study of electron transport and electron transfer in composite polypyrrole + polystyrenesulphonate films (Ren, Pickup) 251
Indium oxide
Electrochemistry of monoazahemin reconstituted myoglobin at an indium oxide electrode (Taniguchi et al.) 5
In situ FTIR spectroscopy
In situ Fourier transform infrared attenuated total reflection (FTIR-ATR) spectroscopic investigations on the base–acid transitions of different forms of polyaniline. Base–acid transition in the leucoemeraldine form (Ping et al.) 301
Ion-exchange
Permselectivities and ion-exchange properties of organically modified sol–gel electrodes (Hsueh, Collinson) 243
Ionic adsorption
Quantum calculations on the adsorption of halide ions on the noble metals (Ignaczak, Gomes) 71
Ion solvation
Gibbs functions for transfer of divalent metal cations from water to water + methanol mixtures using potentiometry, polarography and solubility measurements (El Marackchi et al.) 267
Ion transfer
Differential cyclic voltabsorptometry and chronoabsorptometry studies of ion transfer reactions at the water|1,2-dichloroethane interface (Ding et al.) 35

Kinetics
Detailed analysis of reaction kinetics and mechanisms of electrogenerated tetramethoxythianthrene cation radical and dication (Oyama et al.) 1
A theoretical analysis of the kinetics of reductive cleavage of the carbon–halogen bond in *tert*-butyl halides in polar solvent (German et al.) 235
Kinetics of oxidation
The time-resolved EQCM and study of the kinetics of silver(I) oxide formation on a polycrystalline silver electrode in alkaline solution (Chen et al.) 111

Leucoemeraldine
In situ Fourier transform infrared attenuated total reflection (FTIR-ATR) spectroscopic investigations on the base–acid transitions of different forms of polyaniline. Base–acid transition in the leucoemeraldine form (Ping et al.) 301
Liquid ammonia
Uncommon behavior of the p-GaAs electrode during the reduction of oxygen in liquid acidic ammonia (Goncalves et al.) 25

Maleic hydrazide
Electroreduction of the hydrazide of maleic acid in aqueous solutions (Shibata, Zuman) 79
Manganese dioxide
Voltammetric and electrogravimetric study of manganese dioxide thin film electrodes. Part 1. Electrodeposited films (Wu et al.) 159
Manufacture
Towards the electrochemical manufacture of superconductor precursor films in the presence of an ultrasonic field (Richardson et al.) 21
Mechanism
Uncommon behavior of the p-GaAs electrode during the reduction of oxygen in liquid acidic ammonia (Goncalves et al.) 25
3-Methoxycatechol
Electrochemical study of catechol and some 3-substituted catechols in the presence of 4-hydroxy coumarin: application to the electro-organic synthesis of new coumestan derivatives (Golabi, Nematollahi) 127
3-Methylcatechol
Electrochemical study of catechol and some 3-substituted catechols in the presence of 4-hydroxy coumarin: application to the electro-organic synthesis of new coumestan derivatives (Golabi, Nematollahi) 127
Mixed valence states
Configurational stabilization of mixed-valence states in the star-burst tetranuclear ruthenium complex bridged with acetylene links (Aoki et al.) 189
Modelling
Simulation of anodic Pt oxide growth (Harrington) 101
Monoazahemin
Electrochemistry of monoazahemin reconstituted myoglobin at an indium oxide electrode (Taniguchi et al.) 5
Myoglobin
Electrochemistry of monoazahemin reconstituted myoglobin at an indium oxide electrode (Taniguchi et al.) 5

Nafion®
M–SPE composite powder microelectrodes used in organic electrosynthesis (Jiang et al.) 31
Nanocrystalline films
Photoelectrochemical behavior of coupled SnO_2|CdSe nanocrystalline semiconductor films (Nasr et al.) 201
Nickel
Characterization of electrodeposited Co + Ni alloys by application of the ALSV technique. Professor Aleksandar Despic to commemorate his 70th birthday. (Jović et al.) 43
p-Nitroaniline
Resolution of global signals using ratio differential pulse polarograms: determination of *p*-nitroaniline and *p*-nitrotoluene in their mixture (Grabarić et al.) 227
Nitroaromatic reduction
Electrochemical reduction of nitrotetralones (Squella et al.) 63
Nitrotetralone
Electrochemical reduction of nitrotetralones (Squella et al.) 63
p-Nitrotoluene
Resolution of global signals using ratio differential pulse polarograms: determination of *p*-nitroaniline and *p*-nitrotoluene in their mixture (Grabarić et al.) 227
Noble metals
Quantum calculations on the adsorption of halide ions on the noble metals (Ignaczak, Gomes) 71
Noble metals surfaces
A theoretical study of the interaction of water molecules with the Cu(100), Ag(100) and Au(100) surfaces (Ignaczak, Gomes) 209
Nucleation and 3D growth
The time-resolved EQCM and study of the kinetics of silver(I) oxide formation on a polycrystalline silver electrode in alkaline solution (Chen et al.) 111
Numerical simulation
How accurate is your two-dimensional numerical simulation? Part 1. An introduction (Gavaghan) 147

Optically transparent electrode
Photoelectrochemical behavior of coupled SnO_2|CdSe nanocrystalline semiconductor films (Nasr et al.) 201
Organically modified electrodes
Permselectivities and ion-exchange properties of organically modified sol–gel electrodes (Hsueh, Collinson) 243
Organoelectrosynthesis
M–SPE composite powder microelectrodes used in organic electrosynthesis (Jiang et al.) 31
Overlap integral
Configurational stabilization of mixed-valence states in the star-burst tetranuclear ruthenium complex bridged with acetylene links (Aoki et al.) 189
Oxidation
Oxidation of ascorbate and ascorbic acid at the aqueous|organic solution interface (Suzuki et al.) 119

Oxygen
Uncommon behavior of the p-GaAs electrode during the reduction of oxygen in liquid acidic ammonia (Goncalves et al.) 25

Permselectivities
Permselectivities and ion-exchange properties of organically modified sol–gel electrodes (Hsueh, Collinson) 243
3-Phenyl azo-2,4(3*H*,5*H*)-furandione
Electrochemical reduction of 3-phenyl azo-2,4(3*H*,5*H*)-furandione at the DME (Helmy) 259
Photoelectrochemical properties
Photoelectrochemical behavior of coupled SnO_2|CdSe nanocrystalline semiconductor films (Nasr et al.) 201
Platinum
Performance of a co-electrodeposited Pt–Ru electrode for the electro-oxidation of ethanol studied by in situ FTIR spectroscopy (Souza et al.) 17
Simulation of anodic Pt oxide growth (Harrington) 101
Platinum oxide
An ac voltammetry study of Pt oxide growth (Van der Geest et al.) 89
Polarographic reduction
Electrochemical reduction of nitrotetralones (Squella et al.) 63
Polarography
Gibbs functions for transfer of divalent metal cations from water to water + methanol mixtures using potentiometry, polarography and solubility measurements (El Marackchi et al.) 267
Polyacrylic acid
Intramolecular electron transfer within a water-soluble, ferrocene-labeled polyacrylate (Hatozaki, Anson) 195
Polyaniline
Investigation of the origin of the glucose response in a glucose oxidase|polyaniline system (Skinner, Hall) 179
In situ Fourier transform infrared attenuated total reflection (FTIR-ATR) spectroscopic investigations on the base–acid transitions of different forms of polyaniline. Base–acid transition in the leucoemeraldine form (Ping et al.) 301
Polyprrole
An impedance study of electron transport and electron transfer in composite polypyrrole + polystyrenesulphonate films (Ren, Pickup) 251
Polypyrrole
EQCM studies on polypyrrole in aqueous solutions (Xie et al.) 219
Polystyrenesulphonate
An impedance study of electron transport and electron transfer in composite polypyrrole + polystyrenesulphonate films (Ren, Pickup) 251
Potentiometry
Gibbs functions for transfer of divalent metal cations from water to water + methanol mixtures using potentiometry, polarography and solubility measurements (El Marackchi et al.) 267
Powder microelectrode
M–SPE composite powder microelectrodes used in organic electrosynthesis (Jiang et al.) 31
Pt(100)
The temperature dependence of hydrogen and anion adsorption at a Pt(100) electrode in aqueous H_2SO_4 solution (Zolfaghari, Jerkiewicz) 11
Pulse-electrolysis stopped-flow method
Detailed analysis of reaction kinetics and mechanisms of electrogenerated tetramethoxythianthrene cation radical and dication (Oyama et al.) 1

Ratio differential pulse polarography
Resolution of global signals using ratio differential pulse polarograms: determination of *p*-nitroaniline and *p*-nitrotoluene in their mixture (Grabarić et al.) 227
Reaction mechanism
Detailed analysis of reaction kinetics and mechanisms of electrogenerated tetramethoxythianthrene cation radical and dication (Oyama et al.) 1
Reconstituted myoglobin
Electrochemistry of monoazahemin reconstituted myoglobin at an indium oxide electrode (Taniguchi et al.) 5
Redox interaction
Configurational stabilization of mixed-valence states in the star-burst tetranuclear ruthenium complex bridged with acetylene links (Aoki et al.) 189
Redox potential
Electrochemistry of monoazahemin reconstituted myoglobin at an indium oxide electrode (Taniguchi et al.) 5
Reduction
Uncommon behavior of the p-GaAs electrode during the reduction of oxygen in liquid acidic ammonia (Goncalves et al.) 25
On the understanding of the reduction of sulfur (S_8) in dimethylformamide (DMF) (Levillain et al.) 167
Resolution of global signals
Resolution of global signals using ratio differential pulse polarograms: determination of *p*-nitroaniline and *p*-nitrotoluene in their mixture (Grabarić et al.) 227
Right-angled junctions
Diffusion-controlled current densities close to a right-angled electrode edge (Oldham) 53
$Ru(NH_3)_6^{3+}$
Intramolecular electron transfer within a water-soluble, ferrocene-labeled polyacrylate (Hatozaki, Anson) 195
Ruthenium
Performance of a co-electrodeposited Pt–Ru electrode for the electro-oxidation of ethanol studied by in situ FTIR spectroscopy (Souza et al.) 17
Ruthenium complex
Configurational stabilization of mixed-valence states in the star-burst tetranuclear ruthenium complex bridged with acetylene links (Aoki et al.) 189

Self-assembled monolayers
Solvent and double-layer effects on redox reactions in self-assembled monolayers of ferrocenyl–alkanethiolates on gold (Creager, Rowe) 291
Semiconductor electrode
Photoelectrochemical behavior of coupled SnO_2|CdSe nanocrystalline semiconductor films (Nasr et al.) 201
Signals ratio method
Resolution of global signals using ratio differential pulse polarograms: determination of *p*-nitroaniline and *p*-nitrotoluene in their mixture (Grabarić et al.) 227
Silver
The time-resolved EQCM and study of the kinetics of silver(I) oxide formation on a polycrystalline silver electrode in alkaline solution (Chen et al.) 111
Simultaneous dissolution
Characterization of electrodeposited Co + Ni alloys by application of the ALSV technique. Professor Aleksandar Despic to commemorate his 70th birthday. (Jović et al.) 43
SnO_2
Photoelectrochemical behavior of coupled SnO_2|CdSe nanocrystalline semiconductor films (Nasr et al.) 201
Sol–gel electrodes
Permselectivities and ion-exchange properties of organically modified sol–gel electrodes (Hsueh, Collinson) 243
Solid polymer electrolyte
M–SPE composite powder microelectrodes used in organic electrosynthesis (Jiang et al.) 31

Solvent effects
Solvent and double-layer effects on redox reactions in self-assembled monolayers of ferrocenyl–alkanethiolates on gold (Creager, Rowe) 291
Sulphur
On the understanding of the reduction of sulfur (S_8) in dimethylformamide (DMF) (Levillain et al.) 167
Superconductor precursor films
Towards the electrochemical manufacture of superconductor precursor films in the presence of an ultrasonic field (Richardson et al.) 21

Temperature effect
The temperature dependence of hydrogen and anion adsorption at a Pt(100) electrode in aqueous H_2SO_4 solution (Zolfaghari, Jerkiewicz) 11
Tetramethoxythianthrene
Detailed analysis of reaction kinetics and mechanisms of electrogenerated tetramethoxythianthrene cation radical and dication (Oyama et al.) 1
Tetranuclear complex
Configurational stabilization of mixed-valence states in the star-burst tetranuclear ruthenium complex bridged with acetylene links (Aoki et al.) 189
Time-resolved EQCM
The time-resolved EQCM and study of the kinetics of silver(I) oxide formation on a polycrystalline silver electrode in alkaline solution (Chen et al.) 111

Ultrasonic field
Towards the electrochemical manufacture of superconductor precursor films in the presence of an ultrasonic field (Richardson et al.) 21

Voltammetry
Voltammetric and electrogravimetric study of manganese dioxide thin film electrodes. Part 1. Electrodeposited films (Wu et al.) 159

Water adsorption
A theoretical study of the interaction of water molecules with the Cu(100), Ag(100) and Au(100) surfaces (Ignaczak, Gomes) 209
Water + methanol mixtures
Gibbs functions for transfer of divalent metal cations from water to water + methanol mixtures using potentiometry, polarography and solubility measurements (El Marackchi et al.) 267
